# **DETAILED ACTION**

#### Claim Objections

Claim 79 is objected to because of the following informalities:

In claim 79, line 5, "zirconia" is misspelled as "ziconia." Appropriate correction is required.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 59 and 60 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "light" as it relates to the color of the ceramic in claim 59 is a relative term which renders the claim indefinite. The term "light" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably appraised of the scope of the invention.

Claim 60 is rejected for failing to correct the deficiencies of claim 59.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 78 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 2001-214937.

JP '937 discloses a method of making a ceramic by sintering zirconia and a resistivity modifier. See claims 1-4 of the reference. The resultant ceramic is hot isostatically pressed and has a conductivity of  $10^6$  to 0.1  $\Omega$ -cm. See Claim 4 and paragraph [0039] of the reference.

#### Allowable Subject Matter

Claims 59 and 60 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. Claims 61, 62, 79 and 81-88 are allowed.

As to claims 59 and 60, the prior art fails to disclose or suggest a method of making a ceramic by mixing 60-85 vol% yttria stabilized tetragonal zirconia with 15 to 40 vol% ZnO and sintering the mixture.

As to claims 61 and 62, the prior art fails to disclose or suggest a method of making a ceramic by mixing 50-90 vol% yttria stabilized tetragonal zirconia with 10 to 50 vol% SnO<sub>2</sub> and sintering the mixture.

As to claims 79, 81-88, the prior art fails to disclose or suggest a method of making a ceramic component by densifying a mixture of tetragonal zirconia and the recited resistivity modifiers, and adjusting the resistivity of the ceramic by annealing the body.

Art Unit: 1755

#### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Sample whose telephone number is (571)272-1376. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on (572)272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
